**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species.

Species 1 (Figs 1 – 18; specification, page 33, line 21 – page 35, line 18)

Species 2 (Figs 19 – 45; specification, page 35, line 19 - page 39, line 3)

Species 3 (Figs 52 – 55; specification, page 39, line 20 - page 40, line 6)

Species 4 (Fig 56; specification, page 40, line 7 - page 40, line 9)

Species 5 (Figs 57 – 63; specification, page 40, line 10 - page 40, line 27)

Species 6 (Figs 64 – 67; specification, page 41, line 1 - page 41, line 14)

Species 7 (Figs 68 – 69; specification, page 41, line 15 - page 41, line 20)

Species 8 (Figs 70 – 71; specification, page 41, line 21 – page 41, line 27)

Species 9 (Figs 72 – 82; specification, page 42, line 1 – page 41, line 24)

Species 10 (Figs 83 – 87; specification, page 42, line 25 - page 43, line 11)

2. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of

search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the

prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.
